

HIGH CARD FLUSH

Feel the rush!

High Card Flush is the only non-blackjack and non-poker table game of its kind. This means no knowledge of poker or blackjack is required to play this game. It is simple to learn, fun to play and includes 2 pay table options. High Card Flush is a suits based game and players are only looking for a Flush!

Players are dealt seven cards to make their best Flush hand to play against the dealer's best Flush hand.

HOW TO PLAY

Players must place the Ante wager and any additional side bets to begin the game. Additional side bets include the Flush and Straight Flush wagers.

After all initial wagers are made, both the player and the dealer each receive seven cards. Players may choose to raise up to 3x their Ante.

If a player has at least five cards of the same suit, they can raise up to 2x their Ante. If a player has at least six cards of the same suit, they can raise up to 3x their Ante.

The best Flush hand wins and any side bets are reconciled.

SIDE BETS

Flush – wins odds if the player's hand contains a Flush.

Straight Flush – wins odds if the player's hand contains a Straight Flush.

Ante Wager Win when your Flush is higher than the Dealer, or if the Dealer doesn't qualify.

Raise Wager Raise wager or fold. Make up to 3x your Ante wager, depending upon your Flush. The better your hand, the more you can wager (Dealer must qualify to win).

Flush Wager Compare your Flush to the payable for great odds.

Straight Flush Wager Win big with a Straight Flush. The larger the Straight Flush, the more you win!

The Flush and Straight Flush wagers are independent of the outcome of the Ante and Raise.
